REPORT OF ACTING SUPERINTENDENT

Salem, N. H., Feb. 11, 1927.

To the School Board and Citizens of Atkinson:

It would not be possible for me to give a detailed report of the work of Superintendent Blount. Sufficient to say that I found your schools well organized and disciplined. Teachers are using tests and methods up to date and selected with care. They need the cooperation of all to make their work successful. It is my purpose during the few weeks that I am with you to help carry out Superintendent Blount's plans and to keep the way smooth for Superintendent William J. Nelson, who will soon be at work.

Your faithful music supervisor is helping all to appreciate good music as well as to sing. The coming of the radio makes this appreciation add more and more to our happiness.

The School Nurse deserves your cooperation also. Clean bodies and clean living help clean thinking. Remember that this work costs you but a trifle, since the State pays one dollar and fifty cents to aid in its performance. Read the report of the nurse thoughtfully.

It has been a pleasure to renew old acquaintances in this district and I want to thank the School Board for its patience and forbearance. Their cooperation has made my brief stay more pleasant.

Respectfully submitted,

HOWARD L. WINSLOW,
Acting Superintendent.

REPORT OF SUPERVISOR OF MUSIC

To the Superintendent and School
Board of Atkinson:

I herewith present my annual report as supervisor of music in the Atkinson Schools.

The work in this department seems to grow from year to year. To-day the teaching of music does not mean simply the development of the voice, and the reading of notes. While these subjects are being carried on as successfully as ever much stress is laid upon the appreciation of music.

The work in this line usually proves very interesting to the few who can not sing, and the boys with changing voices. The pupils are given a list of the instruments in the orchestra, divided into four groups as follows: strings, wood-winds, brasses and percussion. With the aid of the victrola the tone of each instrument is listened to separately and then in combination. Pictures are used to show the shape of each one, and method of producing tone. The records used for this purpose have been carefully chosen from some of the world's best known classics.

Even a very young child is susceptible to the sounds of beautiful music. His ear is alert and registers conceptions very early, so the little people too have their listening lessons in music.

Sometimes the story of the music is told before the record is played and the children are allowed to raise their hands when they hear something the teacher has told them to listen for. Very often nothing is told about the music played, but the children show the

teacher just what it tells them to do. In this way better than any other the study of rhythm is developed.

Although the number of pupils at the Academy is small, the four-part chorus work is being carried on as usual. The male quartette which was organized last year had to be dropped as two of the boys left school.

To the Superintendent, School Board and Teachers I wish to express my appreciation of the cordial co-operation given me in my work.

Respectfully submitted,

EVA W. THOMPSON
